

Basic Garden Rules (please see Rules and Regulations for full list)

- The gardens are open 7:00am until dusk from April 1st - October 31st.
- Gardens must be in cultivated status by June 1st.
- Crops and structures over six feet tall are not allowed in plots. Please give consideration to others by planting tall crops where they will have the least impact on neighboring gardeners.
- Gardeners are responsible for maintaining the walkways around their plot(s).
- Common-sense list of No's:
 - No pets
 - No motorized vehicles
 - No littering
 - No loud music
 - No invasive plants (i.e. mint any variety)
 - No taking food that is not yours
- At the end of the growing season, gardeners are responsible for “putting the garden to bed” and leaving the plots as they found them.

Watering Your Garden

- A Rain Barrels will be located in the garden. Please bring your own bucket or watering can.
- Water deeply every few days around the base of your plant.

Protecting Your Plot from Animals

- You may create a mesh or chicken wire cover for your plot to protect it from critters. Remember to make it removable so that you can easily maintain your plot.
- If have concerns and are wondering what is eating your plants, deer usually pull up the whole plant and rabbits usually leave little nibbles.

[The Kitchen Garden](#) by Alan Buckingham

Setting Up Your Square Foot Garden

- Divide your plot into 16 equal squares (12 x 12 inches).
- Use string or wood to create your grid. This may remain on all season.
- Label what you plant in each section. (Depending on the plant spacing required, you may have room for multiple plants in a single square section.)
- Use sequential planting (planting the same crop in two week intervals) so that you have a continual harvest and your vegetables are ready to pick at different times.
- Organic fertilizers are preferred. Use only a small amount around the base of the plant. Too much fertilizer can produce “leggy” plants with minimal fruit.
- Planting marigolds in the corners of your plot may help deter harmful insects.

Garden Notes

March Planting Guide

Vegetable Seeds to Sow Indoors

Brussel sprouts	Cucumbers	Kohlrabi	Sprouting Broccoli
Cabbage	Eggplant	Lettuces	Sweet Potatoes
Chilies	Fennel	Peppers	Tomatoes

Vegetable Seeds to Sow Outdoors

Broad Beans	Leeks	Parsnips	Spinach
Cabbage	Lettuces	Peas	Sprouting Broccoli
